

Pneumatic Edge Bender

This machine is used to bend copper strip on edge to form tight radius bends up to 180° with no material build up in the bend. The machine is pneumatically operated and simple to install and use.

Pedestal or floor mounted.

Supplied with four forming pins covering diameters from 6mm to 25 mm

Any angle up to 180° can be formed

Simple, quick set up.

Pneumatic operation - no other power source required, just connect to a clean, dry air supply.

Pneumatic Edge Bender
