

Rotor Lifter

RL400

This rotor lifting is a heavy duty lifting device for large rotors up to 4 tonnes in weight. It is designed to balance the rotor by means of a slotted support for the shaft and an adjustable ring. This is invaluable for lifting rotors into stators in the horizontal plane.

SPECIFICATION

RL400	
Three options for tubes up to 100mm, 150mm and 200mm diameter	
Safe Working Load	4,000 kg
Dimensions	2000 mm x 1300 mm x 350 mm
Weight	220kg

For transporting heavy rotors it is particularly recommended for the RL400 that an outer support sling is fitted (Sling not provided).
