

Rotor Lifters

The rotor lifter is a heavy duty lifting device for handling large rotors up to 4,000kg in weight. It is designed to balance the rotor by means of a slotted support for the shaft and an adjustable masterlink. This equipment is invaluable for lifting rotors in the horizontal plane. Slots are provided in 3 / 4 difference sizes to suit different shaft diameters

| Model | RL100 | RL400 |
|--------------------------|--|---|
| Maximum lifting capacity | 1,000kg | 4,000kg |
| Lifting Tubes | 50mm, 60mm, 80mm, 100mm | 100mm, 150mm , 200mm |
| Weight | 38kg | 280kg |
| Overall dimensions | Width x depth x height 92 x 110 x 250cm | Width x depth x height 214 x 107 x 264cm |
