

Pneumatic Loop Edge Bending Machine PLB

The edgewise bender as the name suggests is for easily bending copper strip on edge to form tight radius bends.

MACHINE FEATURES AND OPERATION

- Pedestal mounted (can be adapted for bench mounting)
- Lever operated
- Supplied with three forming pins covering diameters from 6mm to 25 mm
- Any angle up to 180° can be formed
- Changing from one coil size to another is simple and quick
- Forming pins can be changed and the conductor width can be reset in minutes
- Pneumatic operation - no other power source required

Pneumatic Loop Edge Bending Machine PLB

SPECIFICATION	
Height (including pedestal)	1118 mm
Width	1143 mm
Depth	356 mm
Weight	170 kg
Air pressure	125 – 150 psi
Air supply	¼ B.S.P.
Maximum coil section	1" x 1/3" (25.0 x 3.5mm)
Minimum evolute	1/4" (6.3 mm) internal diameter
Maximum evolute	1" (25.0mm) internal diameter
